

GAMALIEL LEGUISTA

AI Engineer · Full-Stack Developer

Bronx, NY · gamaleguista@gmail.com · linkedin.com/in/gamaliel-leguista · github.com/AmilGael

PROFILE

AI engineer and full-stack developer who takes client-facing products end to end, from discovery and requirements through production interface and live client demo. Work spans private equity, healthcare, construction, and small business, plus contributions merged into production open-source platforms. Bilingual (English/Spanish); a healthcare operations background drives a focus on simplifying complex systems for the people who actually use them.

PROFESSIONAL EXPERIENCE

Pursuit New York, NY | Sept 2025 – Present
AI Solutions Architect — Google SMB Program (Hispanic Federation) Jul 2026 – Present

- Selected as one of ten builders for an AI deployment program backed by Google, Amazon, and Jobs for the Future, paired one-to-one with a NYC small business and delivering to a public Demo Day at Google's New York offices.
- Led bilingual (English/Spanish) client discovery and authored the product requirements document across three revisions, converting an on-site operations walkthrough into a scoped, signed-off build plan.
- Built a bilingual Next.js prototype covering a filterable catalog, fixed-price model, service request flow, and Google Business Profile integration, architected for client ownership on accounts the business controls, with no recurring platform fees or vendor lock-in.

AI Software Engineer — AI-Native & Cybersecurity Fellowship Sept 2025 – Present

- Owned the full UI/UX layer of Vantage, an enterprise AI executive search product, carrying the interface from architecture through a live demo to Blackstone's investment team.
- Designed and integrated the multi-step LLM workflows behind candidate search, classification, and ranking, and defined the fit-scoring criteria with the backend engineer.
- Named the product and shaped design direction from competitive research on the executive search landscape, working as one of three engineers in direct contact with client stakeholders.

Urban Health Plan Bronx, NY | Aug 2023 – Aug 2026

Patient Service Representative & Health Information Management Associate

- Maintain physical and electronic health records for a high-volume community clinic, covering data entry, record queries, and chart retrieval under HIPAA handling requirements.
- Serve as a bilingual point of contact for patients and clinical staff locating records and information on request.
- Process record and chart requests from patients, providers, and external parties, tracking each through completion against clinic turnaround expectations.

SELECTED PROJECTS & OPEN SOURCE

Vantage: Executive Intelligence | Enterprise AI platform delivered to Assured Healthcare Partners

React · TypeScript · Tailwind CSS · FastAPI · LLM integration · Thrive TRM

- Executive search platform for private equity users: plain-language queries return AI-ranked, fit-scored healthcare executives, layering retrieval and ranking over Thrive TRM as the client's system of record rather than replacing it.
- Delivered as a tailored client engagement under a three-person product team, from requirements through live stakeholder demo.

Twenty CRM — Internationalization Restoration | Merged contribution

TypeScript · React · i18n · github.com/twentyhq/twenty/pull/21424

- Traced hardcoded English strings bypassing the translation system and merged a fix restoring translation coverage across all 27 supported languages, platform-wide.

RAPHEL | Construction documentation platform

Next.js · TypeScript · PostgreSQL · SHA-256 hash chaining

- Tamper-evident record system where each entry is cryptographically linked to the one before it, so any alteration is detectable, behind an interface built for non-technical site personnel.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL
AI & ML	LLM integration (Anthropic, OpenAI, Gemini), RAG, vector search (pgvector), agent workflows, NLP
Engineering	FastAPI, Node.js, REST APIs, PostgreSQL, Prisma, React, Next.js, Tailwind CSS, Git, Linux/CLI
Security & Practice	OWASP Top 10, STRIDE threat modeling, client discovery, product requirements documents

EDUCATION & CREDENTIALS

City College of New York — B.S. Computer Science (in progress) · Microsoft AI Engineer Program Certification (in progress)

Volunteer — Light a Candle Foundation, education and medical resources in the Dominican Republic (2016 – Present)
